

Patent licencing

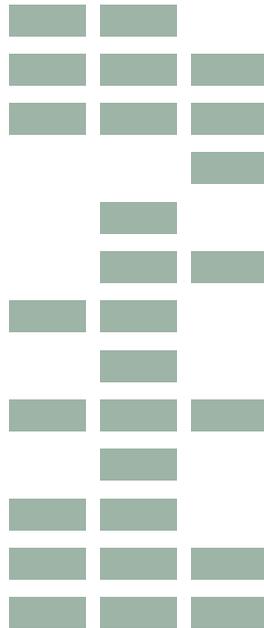

batipac.pro

Bat'IPAC manufactures and provides an eco-responsible and solidarity-based cardboard material for construction: IPAC®.

Bat'IPAC France wishes to replicate its model in the other countries under license.

You are a European citizen and wish to contribute to social change and build a more sustainable world in the building field?

YOUR EXPECTATIONS

For your country, you are looking for a project:

- Unique and major
- With an innovative philosophy
- With a socially committed economic model
- From sustainable development
- That meets current and future regulation
- With a local production

OUR SOLUTION

L'IPAC®, with its intrinsic properties and its disruptive production model:

batipac.pro

→ A major material in construction used to build the walls, roof, floorings and partitions of a building.

→ Freestanding panel that constitutes the wall

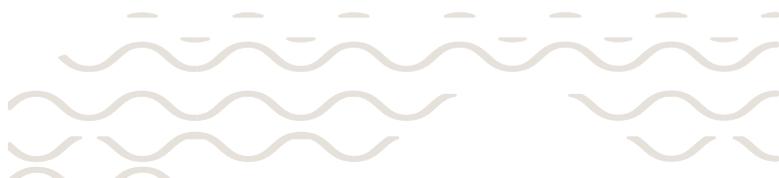

→ Great thermal insulation

→ Great sound insulation

→ Protected from water and light

BUT ALSO

→ Access to a trademark that guarantees a responsible economic model.

→ Allows you to stand out among other existing solutions.

→ Brings a real CSR traceability in your constructions, combining circular economy and responsible industry:

- **100% recyclable material**
- **Manufactured in short circuit by insertion organizations**
- **Made of 100%-recycled paper**
- **Exclusive partner and provider of cardboard: DS Smith Packaging, international industrial stakeholder of recycling paper/cardboard sharing our values.**

→ Is adapted both for new housing construction (individual or collective), service sector and other technical buildings, and for renovation works (ETI / ITI).

→ Enables to protect the users' health.

→ Enables the implementation of a local economy in your country: work in collaboration with insertion organizations.

OUR GUIDANCE

- + **Provision of the technical specifications including all the European trials for the accreditation in your country.**
- + **Support in developing your business plan.**
- + **Possibility of organising information training meetings with your partners, clients, members, etc.**
- + **Provision of our show-room by appointment.**
- + **Provision of a full package for production, including:**
 - An identified and exclusive provider of the main material: DS Smith Packaging, European leader in this field, responsible for volumes and cardboard quality.
 - Manufacturing and assembly plans of the production line.
 - The QMS (Quality Management System) quality procedures manual.
 - Production basic rate of IPAC®.
 - Basic rate for walls, roof and floorings manufactured with IPAC®.
 - Possibility of accessing the decentralized production management tool (online ERP).
- + **Guidance in adapting the range in your country.**
